

FLEXISLIDE™

Lateral Patient Transfer Device

THE COMPLETE CIRCLE OF PROTECTION

As the global vanguard in infection prevention, **only Cantel delivers the Complete Circle of Protection**, a full-value, proactive partnership dedicated to helping you remove risk, streamline operational efficiencies and optimise your success.

PROCEDURE Reducing the risk of patient cross contamination is at the forefront of infection prevention. Cantel innovates infection control products designed to improve patient outcomes, while increasing procedural efficiency.

FLEXISLIDE IS THE SINGLE-USE LATERAL PATIENT TRANSFER DEVICE OF CHOICE IN UK HOSPITALS AND IS ROUTINELY USED IN OVER 200 NHS AND PRIVATE HOSPITALS.

FLEXISLIDE is a Single-Use Lateral Patient Transfer Device designed to facilitate safe and easy patient handling, helping to prevent back strain injury. As a single-use product, FLEXISLIDE also assists in the prevention of cross contamination. It is incredibly strong and has been independently tested to be capable of lateral transfer of up to 400kg.

FLEXISLIDE is ideal for departments across the hospital, but particularly designed for use in procedural environments such as:

- Operating Room
- Radiology
- Maternity
- Day Surgery
- Accident & Emergency
- Endoscopy

KEY FEATURES INCLUDE:

- Fully tested – For lateral transfer up to 400kg
- Single use – protecting staff and patients from cross infection
- Easy-slide design
- Environmentally responsible – Polypropylene is 100% recyclable
- Latex free and water resistant
